Subject: Re: Master Plan

Dear Noel / Stephen

As a resident of Canberra and also the owner of a small business involved in the Construction Industry, it is important for us to have the availability to commute directly between Canberra and our other capital cities.

We also need to have direct contact to major cities in Asia as we are doing more and more business with these countries.

We do not want our Airports hours of trade compromised by a restriction to the time that they can operate, because someone deemed that a housing development be built under the flight path.

We consider that our Airport will play a major role in the growth of Canberra, not only for Tourism but for Employment opportunities for our future, so any assistance by the Government or the Private Sector will be appreciated.

Yours sincerely,
Tracey Hooper
