

25th April 2009

Mr Stephen Byron
Canberra Airport
2 Brindabella Circuit
Canberra Airport ACT 2609

Dear Stephen,

On behalf of Delta Building Automation Pty Ltd I would like to personally congratulate you and the Capital Airport Group on your recent announcement made in the Canberra Times on the 7th April 2009, headed "Canberra Airport to undergo \$350m upgrade".

The contribution by way of job creation and infrastructure that your organisation has made over the last ten years to the wider Canberra community has been significant, only to be crowned by the by makeover of the Canberra Airport which will make it and the Brindabella Business Park the best in Australia.

I also take this opportunity to state my full support for the Canberra Airport Mater Plan 09.

The key objectives nominated in the Master Plan will greatly assist (if not drive!) the expansion and growth of the region and will give all Canberran's something to be proud of:

- An Airport Terminal worthy of its place as the gateway to the National Capital.
- An Airport capable of meeting the needs of overflow flights from Sydney.
- A Multi-modal transport hub for passengers and freight.
- Provide the continued environmental and sustainable development of land .

The redevelopment of Canberra Airport as a multi-modal transport hub for passengers and freight will hugely increase our organisations ability to do business with local, interstate and overseas clientele. The capability for Delta Building Automation to receipt imported product directly into Canberra will increase the speed and efficiency in which we can provide service and products to the wider market place.

It would be a huge disappointment should the opportunity to provide overnight Freight services directly into Canberra be squandered by the construction of housing under flight paths or the introduction of noise curfews.

Combined with the multi-modal transport hub, the introduction of a High Speed Rail service along with the overflow of domestic and international passenger services from Sydney Airport, Canberra will finally have the chance to call itself a genuine place to do Business as well as the home of Government.

Delta Building Automation is a locally owned and run organisation with a full time staff 28; within the "Delta" family we have 25 school age children and 22 mortgages. The continued employment of our people can only be achieved with the support of the Capital Airport Group and the growth of our region.

The Canberra Airport Master Plan 09 would ensure the longevity of our organisation and other similar Canberra based businesses and as such should widely embraced as the life blood of our community into the future.

Canberra Airport – we salute you!

Kind Regards,

Timothy Davis
