Subject: [NEWSENDER] - submission of comment on the draft Canberra Airport Master Plan - Message is from an unknown sender

Dear Canberra Airport

I wish to comment on 2009 Draft Master Plan for the Canberra Airport.

I strenuous oppose an overnight curfew. I am in strong support for Canberra Airport to be freight hub. I do not agree with the narrow minded views expressed from some interest groups to seek further restrictions on the airport operations. I live in the northern suburbs of Canberra and I never hear noise from flights taking off and landing. I think it is a fantastic idea to have the air port run 24 hours, especially using the late night period for freight.

The current areas of no residential development should be preserved to enable the Canberras airport to operate to maximum efficiency. I oppose the development of housing in NSW that would impinge on the Canberra Airport flight paths.

I am in no way connected or involved with the Canberra airport or its operations.

Yours sincerely

Robert Henderson
