Dear Sirs,

Re: Capital Airport Master Plan

Having seen the overview of the Canberra Airport Master Plan I take this opportunity to commend the Canberra Airport Group for their long term commitment to further developing the Airport precinct.

The people of Canberra and Queanbeyan should feel proud of the development of this area to date and the proposed future development which will encompass a major transport hub for this region.

Canberra is isolated from the eastern seaboard and the forward planning of the Canberra Airport Group will shrink this gap which has been the bane of Canberra business for a long time.

The major development proposed would undoubtedly be the largest investment by a private company in the ACT, providing much needed works for the Canberra region, ongoing and new employment opportunities and the creation of additional permanent employment both at the airport and with businesses who will provide long term support for the precinct.

People in this region should embrace the proposed changes that will create a magnificent welcoming mat to travellers from all parts of the world.

The proposed freight hub will in itself create opportunities for Canberra's population and businesses alike. This will only happen if the airport is allowed to develop the hub without restrictions to make it commercially viable.

On behalf of Honeywell in the ACT we fully support the draft plan and wish the Canberra Airport Group every success in the future.

Please do not hesitate to contact me on 0419 619044.

Yours faithfully,
HONEYWELL LIMITED.
