Stephen Byron  
Managing Director  
Canberra Airport  
2 Brindabella Circuit  
Brindabella Business Park ACT 2609

Dear Stephen

I felt it was my duty as a Canberra Citizen and Business Owner to write this letter in support of the Canberra Airports twenty year master plan as it is of great importance to Canberra and the general community and economy.

Not only will this plan provide the Nation's Capital with an International Airport that will be an icon for all Australians to be proud of, it will also bring much needed economic growth and jobs to the region. This plan also highlights the Canberra Airport being a major flight hub and second airport to Sydney with no curfews as well as the possibility of a fast train between Canberra and Sydney all of which complement each other.

The plan also talks about the development of housing and flight paths, which I strongly protest as this makes no economic sense and will stagnate Canberra's growth as a Nation moving forward, why put these restrictions on Canberra when we have the opportunity to say no now?

It has been a privilege to me and I'm sure the rest of the Canberra community to see the progress and the ongoing development of the Canberra Airport. The owners have made an enormous contribution to this project for the people of Canberra and should be congratulated and praised for the significant investment and foresight which will benefit all Canberrans and generations to come.

I applaud you Canberra Airport and thank you for what you have done for Canberra in the last 11 years which has made this 20 year master plan a reality which all Canberrans will benefit from enormously! Congratulations.

Kind Regards

Andrew Dimoff  
Managing Director  
Instyle Indoor Plant Hire

#### Award Winning Excellence
