Stephen Byron
Managing Director
Canberra Airport.

Dear Stephen,

As you are no doubt aware my company has had a close relationship on a business level for close to 25 years with both Capital Airport Group and previous business owned by the Snow Family.

I have followed, with keen interest, the development of both the airport and the associated business park.

It is with much pride that I offer my complete support for the up coming redevelopment of the terminal and infrastructure with the obvious benefits it has for Canberra and all who live here.

The benefits associated with an International Air Terminal and the other services offered including fast freight service to the Canberra region will mean a great deal for the future of the city and its inhabitants.

I have read a lot about the flight path problem with associated noise that would have to be endured by a far greater number of local dwellings if the proposed developments in the existing flight path go ahead. I find it incredible that the planning authorities would even consider the proposed housing developments, given the future problems involved.

My association with your companies' activities and method of achieving your goals, particularly in the development of buildings and property make me proud to be associated with you. The quality of the finished product is always above expectations and the concern for environmental factors is very commendable.

I remain
Yours Faithfully

Philip J McLean
Managing Director
