**Subject:** Canberra Airport Master plan

Noel

I have looked through the Canberra Airport Master Plan 2009 and support it's intention to:

- Become an international airport, providing direct flights to NZ, Singapore and in the future to the US and other parts of Asia & Middle East;
- Develop a high-speed rail link between Canberra and Sydney;
- Operate as Sydney's 2<sup>nd</sup> airport (in conjunction with the high-speed rail link).

Of course, these additional facilities should be provided without undue impact (particularly noise) on Canberra & Queanbeyan residents, and agree the Noise Abatement Areas should be retained –without the noise-sharing strategy.

I also look forward to observing many of the environmental initiatives adopted in the office buildings incorporated into this development.

Yours sincerely,

**Jonathan Dalton**  
Director
