Subject: development at Tralee and Environa

Its just unbelievable that our authorities both in NSW and the ACT would not try to prevent problems with residential areas under a flight path. That goes for the proposed new developments and the residential areas that will inevitable be asked to share in those problems. All this for some opportunistic developers who must have know that those areas would be under the flight path. What do they care though as long as they can make a buck before the problems really escalate.

Its disgusting.
