### **MASTER BUILDERS AWARDS RECOGNISE CONSTRUCTION EXCELLENCE**

The Capital Airport Group has congratulated its building partners, Construction Control Australia, for winning numerous accolades at the 2017 ACT Master Builders Excellence in Building Awards.

The Managing Director of the Capital Airport Group, Stephen Byron, said Construction Control had been instrumental in achieving the highest standards of building and innovation since the Snow family bought the airport 19 years ago.

“We were delighted, but not surprised, to see Construction Control win the Fitout, Refurbishment or Alteration Award for their outstanding work on our new International Terminal”, Mr Byron said.

“Construction Control Australia will, once again, be our partners in building the \$300 million Constitution Place - the first private sector development on the Vernon Circle side of London Circuit, east of Northbourne Avenue”.

“We have no doubt that our commitment to excellence, quality and perfectionism will be matched again by the work of Canberra’s award winning building company”.
